

## OVERHEAD DOOR TECHNICIAN TRAINING PROGRAM

The Overhead Door industry has been in dire need of safe professional training program for those looking to get into the trade or wanting to sharpen their knowledge base and skillset. Finally, **Nash Gil Doors Inc** offers a hands-on **Overhead Door Technicians'** training course taught by master technicians available to help you and your team better understand the diverse world of Overhead Doors. **Nash Gil Doors Inc** is committed to promoting and encouraging growth within our industry by training new commers to the trade and by helping veteran technicians stay current with hands on training.

**NASH GIL DOORS INC** home base and overhead door training facility is part of a 17,000 sq ft repurposed school on 4 acres in Capreol Ontario located approximately 30kms from the heart of the Greater city of Sudbury. Greater Sudbury is the largest city in Northern Ontario, with a population of 166,004. Sudbury is one of the largest mining communities in the world and contains nine operating mines, two mills, two smelters and a nickel refinery. Along with the mining industry the city boasts the usual commercial businesses and residential clients all with overhead door needs. **Nash Gil Doors Inc** provides service and installation for all types of overhead doors to customers throughout Ontario with a strong focus on the mining sector. We also manufacture our own line of Hybrid ventilation doors for the underground mining market. Our team installs and services doors on surface and as far down as 13,000 feet under ground!

## **OVERHEAD DOOR TECHNICIAN TRAINING PROGRAM**

### **Instructor Information**

Tony Nash – President of Nash Gil Doors Inc / Trainer / Master Door Technician. Tony has more than 30 years' experience installing and maintaining a variety of door systems on surface and underground. Tony was one of the original owners of Provincial Doors Inc and lead the door division at Sling Choker in Sudbury Ontario before partnering with Ron Gilbeau to establish NGD Inc in 2019. Tony is well known for his stories and personable demeanor.

Marc Carr – Nash Gil Doors Inc Supervisor / Trainer / Welding Supervisor/ Master Door Technician. Marc was also one of the original owners of Provincial Doors Inc and has dedicated the last 30 years his life to the door industry. From technician to business owner, you will have a difficult time finding another door tech with his experience and skill set.

Shane Garratt – Nash Gil Doors Inc / Underground Supervisor / Trainer/ Lead Door Technician / 5 S certified / Lean Six Sigma green belt. Shane began his journey working at TNR doors 18 years ago as a fabricator quickly working his way up to field service technician and consultant. While operating his own overhead door business in the Toronto area he was presented with an opportunity to expand on his skill set and took a position in engineering and design at Micanan in Montreal Canada. He is a wealth of information and asset to the NGD family.

## Course Outline

### 2-day Intro to Overhead Doors

During this two-day course we will cover safe practice techniques to utilise when near and when operating 3 different types of overhead doors. You will learn to identify, and trouble shoot small issues before they turn into costly repairs. We will work to identify all the components of a sectional door, rolling steel (fire) and rubber door system. You will also learn to how to install a residential standard lift sectional door with side mount and trolley operators as well as install and drop test a rolling steel fire door. Upon completion of the course, you will be presented with a certificate indicating you have successfully completed the Intro to Overhead Door course and some cool NGD and supplier swag.

### 2-day Rolling Steel Fire Door course

During this two-day course we will cover safe practice techniques to utilise when near and when operating a rolling steel fire door system. You will learn to identify, and trouble shoot small issues before they turn into costly repairs. You will learn to identify all the components of a rolling steel fire door including the different materials and finishes. You will learn to install, service and operate as well as drop test and reset a rolling steel fire door system. You will learn about the various methods of operations and automatic closing devices. Upon the completion of the installation and drop test of the fire door system you will write an exam as proof of comprehension of the materials covered. Once you have successfully completed the exam, you will leave with a rolling steel fire door drop test and seminar competency certificate and some cool NGD and supplier swag.

### 2-week Technician Level 1 course

During this two-week course we will cover safe practice techniques to utilise when near and when operating a all types of door systems (sectional / rolling steel / rubber and man doors). You will learn to identify, troubleshoot and service small issues before they turn into costly repairs. You will learn to make door cables and measure springs for sectional doors. Identify all the components as well as install, service and operate a sectional door / rubber doors / rolling steel (fire) and man door. You will complete an in-class exam based 70 % hands on and 30% theory to prove comprehension and competency. Once you have passed the exam you will be awarded a level 1 NGD door technician's certificate.
